

STEAM Programming

EACH CHILD, EACH OPPORTUNITY, OUR RESPONSIBILITY

We want our students to be fully prepared to succeed in middle school and beyond. That’s why Samuels is a STEAM school that infuses science, technology, engineering, arts and math into each class. We believe understanding these concepts at an early age will bring lifelong benefits. We are FAMILY -- check us out!

FULL STEAM AHEAD

With the introduction of a new lab, we aim to create a better future for our students by instilling a desire to learn about STEAM concepts at the earliest stages of education.

“ *The STEAM program is a great opportunity that kids might not find anywhere else.*” – SAMUELS STAFF

PROJECT-BASED LEARNING

STEAM is part of the “specials” rotation at Samuels, meaning every student gets to participate. Fun, hands-on projects, such as designing and building a board game in team setting, keep the kids engaged and excited about their learning.

“ *Each classroom has extensions of activities that align with STEAM.*” – SAMUELS STAFF

READY FOR THE FUTURE

By providing applicable skills in science, technology, engineering and math, Samuels students leave prepared for the next level of their education. Samuels is a STEAM “pipeline” school, allowing interested students to continue this focus at Hamilton Middle School and Thomas Jefferson High School.

Samuels Elementary

- ECE to Fifth Grade
- Amazing diversity
- STEAM academics
- Community garden
- SOAR afterschool program
- A staff that cares

FLY Core Values

- F** BE A FRIEND
- L** BE A LEARNER
- Y** YOU OWN IT
